2	2 - 3	0	1	0	2
1	0 - 1	0	1	0	1

This conversion table is based on an average of 9 conversion tables released by ACT. The leftmost and rightmost columns represent the scale score for each subject area. The columns labeled by subject area tell you approximately how many questions you need to answer correctly in order to get the scale score marked in that row. For example, if you answer 38 English questions correctly, your scale score is most likely to be 17.

The numbers highlighted in yellow correspond with ACT's College Readiness Benchmarks.
